Esta colección de álbumes con obras de diferente dificultad está pensada para la formación progresiva del guitarrista flamenco. Es muy difícil catalogar cada obra con una dificultad exacta, ya que cada persona es realmente única y el pasaje que puede ser muy complicado para algunos puede no serlo tanto para otros, pero he estimado la dificultad por lo global que encierra cada pieza. Basándome en los grados instaurados en la enseñanza reglada he establecido cinco niveles: Grado elemental, Grado elemental alto, Grado medio, Grado medio alto y Grado superior.

Me he esforzado para que cada pieza, independientemente de la dificultad, tenga la calidad suficiente para considerarla también obra de concierto. Muchas veces, en la guitarra flamenca, estamos mal acostumbrados a valorar la calidad de una obra por su dificultad más que por su musicalidad, la infravaloramos si la obra es sencilla, bien por su técnica, bien por su armonía simple, ritmo... deberíamos apreciar más la música por lo que escuchamos que por lo que “vemos”. Alguien dijo una vez de un guitarrista muy valorado: “es un guitarrista fantástico para lo ojos, pero no tanto para los oídos”.

En las obras de Grado elemental y medio he querido que figuren los elementos más tradicionales de cada estilo y que le dan el carácter a cada palo: tonalidades, secuencias armónicas típicas, clichés típicos como introducciones, llamadas, remates, finales... elementos que son necesarios para conocer en profundidad cada toque y así después poder innovar en ellos, cosa que sucede en las obras de Grado superior que incorporo.

Espero que el material sea lo suficientemente atractivo para que podáis disfrutar de la música que contienen estas obras y aprender de ellas desde todo lo que encierra su interior.

This collection of books, with pieces of varying levels of difficulty, has been compiled with the student of flamenco guitar in mind. It's difficult to classify each piece at its exact level of difficulty because each person progresses differently, and what is difficult for some might not be for others. But we've established the level of each piece based on its overall difficulty. The pieces are divided into the following levels of difficulty: Beginner, Advanced beginner, Intermediate, Advanced intermediate and Advanced

I've also made sure that each piece, regardless of its level of difficulty, is good enough to be considered as a concert piece. Often in flamenco guitar we have the bad habit of judging the quality of a piece based on its difficulty rather than its musicality, so we undervalue a piece if it has a simple technique, harmonic structure, or rhythm... but instead we should appreciate the music more for what we hear rather than what we “see.” Someone once said of a highly esteemed guitarist: “he’s a fantastic guitarist for the eyes, but not so much for the ears.”

In the Beginner and Intermediate pieces I've made sure to include the most traditional elements that give each flamenco style (palo) its character: tonalities, typical harmonic sequences, common introductions, llamadas, remates, endings... elements that are necessary to learn each piece in depth and to be able to innovate within them, which is something we incorporate in the Advanced books.

I hope that this material is sufficiently attractive for you to enjoy the music these pieces contain and unlock the lessons they hold within.
